

**Edith Helley**

**Memory of cattle using the shippon.**

That used to be all open.

*This was open?*

Yeah, 'cos when they brought the cattle in they'd go down there.

*So do you remember that, the cattle being in here?*

I can just remember that, you see, you can imagine a cow or anything wouldn't go through there.

*So this partition wasn't there at all, you just came in the front door and it was right open to the shippon?*

That was open, yeah, that was open.

*Do you know when the shippon stopped being used for cattle?*

Oh, it wasn't used a lot when we were going to school so it must have been stopped, I should say, when I was seven, so that would have been 1927.
